Next Steps	2

Overview

This sample document exercises `mpdf` with headings, code, math, tables, and an image.

Figure

A light gray rectangular box containing the text "MPDF sample figure" in a bold, black, sans-serif font.

Figure 1: Bundled sample figure

Math

Inline math works, for example $e^{i\pi} + 1 = 0$.

Display math works too:

$$\int_0^1 x^2 dx = \frac{1}{3}$$

Code

```
from pathlib import Path

def render_markdown(path: str) -> Path:
```

```
return Path(path).with_suffix(".pdf")

print(render_markdown("report.md"))
```

Table

Feature	Status
YAML metadata	Preserved
CLI overrides	Supported
XeLaTeX math	Supported

Next Steps

Run `mpdf example.md` to create `example.pdf` beside this file.
